Touchscreen Display

Fluid Out Detector

High-Speed Peristaltic Pump

Pressure Sensor

Electromagnetic Inductive Heater

Air Detector

Infrared Temperature Probe

Valve Wand

Aluminum-Free Disposable Set

SIMPLIFY YOUR WORKFLOW

Unburden your staff with a rapid infuser designed to reliably perform under the most extreme circumstances. Supported by a single operator and with features such as pre-assembled/color-coded disposables, automatic priming/repriming, and near-instantaneous fluid warming, you can be assured you have the resources available to remain focused on the task at hand—saving a life.

REDUCE TRANSFUSION COMPLICATIONS

Elevate your standard of care during high-flow fluid resuscitation by harnessing the enhanced patient safety capabilities of The Belmont® Rapid Infuser RI-2.

- Reduce air emboli risk with automatic air detection and removal
- Eliminate sources of waterborne infection by utilizing dry, electromagnetic induction heating technology
- Gain unmatched insight into device operating conditions with on-screen display of alarms and alerts and real-time procedure metrics

DON'T DELAY, ACT TODAY AND SCHEDULE A DEMONSTRATION!

Contact your local Territory Manager, «Rep», and mention code ANES2021 for a special offer.
