Delivering with confidence when it matters most.

Severe, uncontrollable bleeding during childbirth can occur when you least expect it—but that doesn't mean you're not ready, because you have The Belmont® Rapid Infuser RI-2.

- Easily operated by a single technician and set up in minutes, The Belmont® Rapid Infuser enables you to take lifesaving action at a moment's notice
- Overcome the most severe uterine blood loss with near instantaneous fluid warming and selectable flow rates up to 1 L/min
- Reduce the risk of rapid transfusion complications utilizing built-in safety features designed to prevent accidental infusion of air
